

# MakeBreaks Digital Coloring Pages

Thank you for download this free digital coloring page from makebreaks.com

If you are new to using digital coloring pages I have some tutorials for you [starting HERE!](#)

In short, a digital coloring page is a coloring page I have created for use in apps such as Procreate and Affinity Photo/Designer. You can use any app, however I strongly suggest you use an app which supports layers (most do).

Of course you can print these pages and I have purposely made them high resolution so you'll get great looking prints of your finished page - however I have created these pages as **transparent PNG files** which means you can do all sorts of fancy things with them in your coloring apps.

I would LOVE IT if you tag me on Instagram or your favourite social media site if you use these pages #makebreaks #digitalcoloring 😊

**If you would like me to share your finished artwork on the site or social media, you are very welcome to send me a finished copy of your project (you are welcome to watermark it). Send it to [kate@makebreaks.com](mailto:kate@makebreaks.com) with any info about how you would like me to credit your work and website or social media links.**
